# Introduction

The BAUET Library Automation System is a cutting edge web-based project designed specifically for the efficient management of the library at BAUET. This system revolutionizes traditional library management by integrating advanced technology and user friendly interfaces, empowering both librarians and users with streamlined processes and enhanced accessibility to resources.

## Objectives

**Enhanced Efficiency**

**Improved Accessibility**

**Enhanced User Experience**

**Enhanced Security and Privacy**

**Reducing the workload of librarians**

# Features

- 1** **Separate Registration Processes for Students and Teachers**
- 2** **Account Approval System**
- 3** **Book Request Management System**
- 4** **Borrowing History Tracking System**
- 5** **Email Notification System**

# Cost Benefit Analysis

Initial Investment: 4.5 lakhs TK

Breakdown of Costs:

- Software Licensing and Hardware Procurement
- Training Costs
- Development and Maintenance Costs

Benefits Analysis:

- Time Savings & Enhanced Access
- Improved Accuracy & Space Efficiency
- Analytics & User Satisfaction

# Future Scope

**Expanded  
Digital  
Collections**

**Mobile  
Application  
Development**

**Community  
Engagement  
Initiatives**

**Global  
Collaboration  
and Resource  
Sharing**

**User  
Feedback and  
Iterative  
Improvement**

# Design

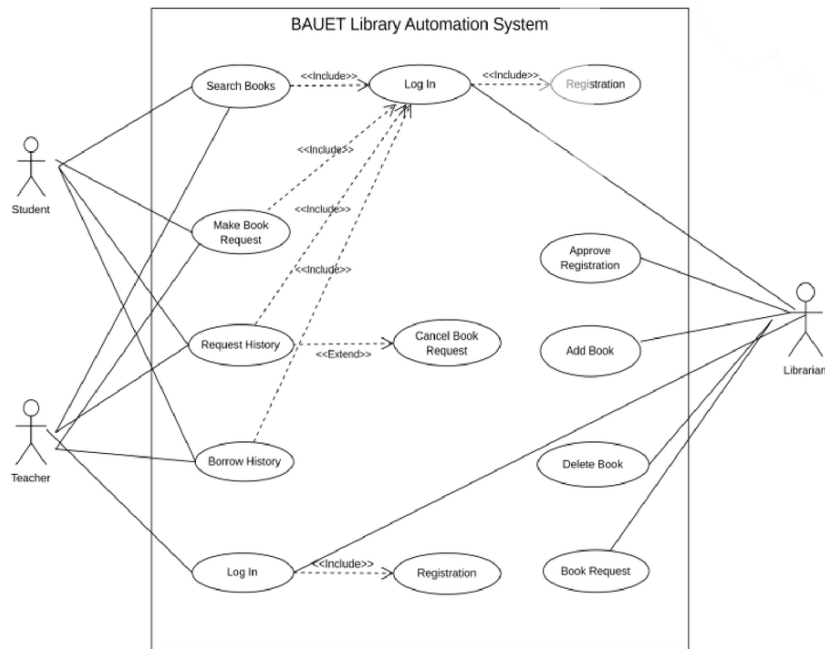

Fig. 1: Use Case Diagram of BAUET Library Automation System

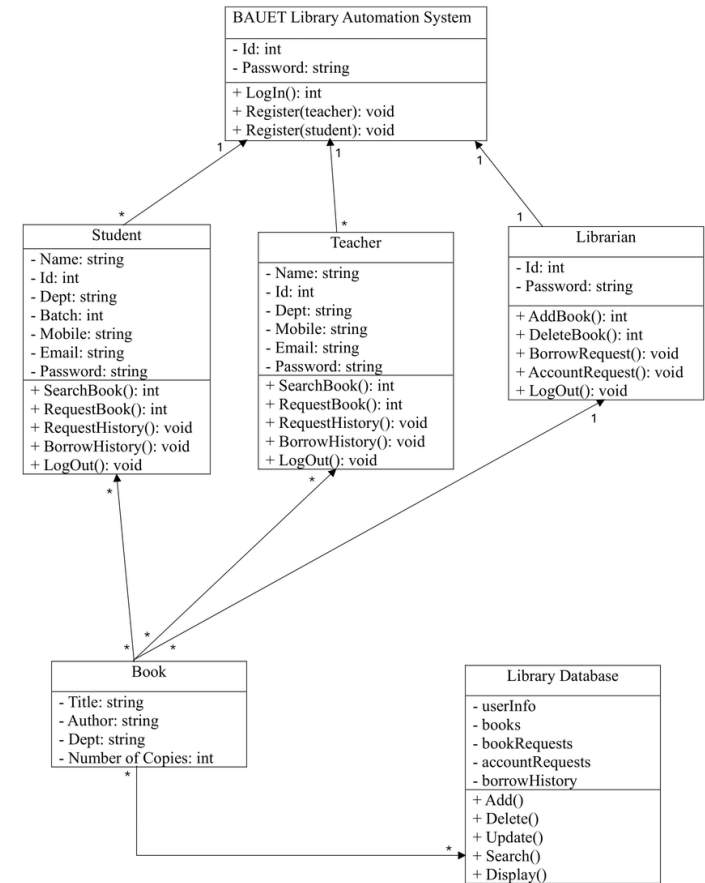

Fig: UML Diagram of BAUET Library Automation System

# Implementation

- 1** Frontend Development: HTML, CSS, JavaScript
- 2** Backend Development: PHP
- 3** Database Management System: MySQL
- 4** Testing and Quality Assurance
- 5** Deployment and Maintenance

## Post Implementation

**User  
Training and  
Support**

**Feedback  
Collection**

**Performance  
Monitoring**

**Feature  
Enhancements**

**Regular  
Maintenance  
and Updates**

# Conclusion

The implementation of the BAUET Library Automation System aimed to modernize library operations, enhance user experience, and improve overall efficiency. Also some achievements are Streamlined Operations, Improved Accuracy and Data-Driven Insights. Modernization of library services enhances the reputation of BAUET. Regular updates and adaptations to meet evolving user needs and technological advancements. Continuous feedback and stakeholder engagement will drive ongoing improvements and innovations in library services.
